COLLEGE

Early College Opportunities

Middle College Program

- Allow students to complete an associate degree or college certificate in full while still in high school. These programs are extremely rigorous, with a competitive admissions process, and requires a three-year commitment from the student. Program begins in grade 11 and students continue in the program for 3 years, adding one more year of high school.

Dual Enrollment

- Dual enrollment courses are traditional college classes usually held on an LMC campus but are sometimes offered at a high school or tech center.

Direct Credit

- These classes are taught by college credentialed teachers at a student's high school or tech center during the regular school day. The student receives both high school and college credit for these courses.

What are the benefits **OF EARLY COLLEGE?**

1

Early College offers the opportunity to earn college credit and work towards a college degree

- **Reduces overall cost of college tuition**
 - **Tuition and fees are typically paid by the high schools**

2

Transfer friendly courses that are designed to transfer with ease

- **Work on Transferring your individual courses, your set of MTA courses, or stay with us!**

What are the benefits **OF EARLY COLLEGE?**
